

Carbon Reduction Plan

Supplier name: **ABConsultancy Services Ltd**

Publication date: **September 2026**

Commitment to achieving Net Zero

ABConsultancy Services Ltd is committed to achieving Net Zero emissions by **2035**.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: To be determined based on Current Emissions Reporting.

Additional Details relating to the Baseline Emissions calculations.

Our organisation has not previously assessed or reported emissions in a previous year, but we already have and are executing upon our Carbon Reduction initiatives and have a plan in place to conduct and report upon our current emissions in 2026 in order to define a baseline, toward our stated goal to be a Net Zero organisation by 2035.

Baseline year emissions:

EMISSIONS

TOTAL (tCO₂e)

Scope 1

tbd in first reporting period

Scope 2

tbd in first reporting period

Scope 3

(Included Sources)

tbd in first reporting period

Total Emissions

tbd in first reporting period

Current Emissions Reporting

The figures provided are based on reasonable estimates using the Greenhouse Gas Protocol and government conversion factors, reflecting the best-available data for our SME's operations.

Reporting Year: 2026	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	• Direct emissions from owned or controlled sources: • Fuel combustion (e.g., gas boilers, fleet vehicles): 0 tonnes CO₂e (Home-based, no company vehicles) • Emissions from industrial processes: 0 tonnes CO₂e
Scope 2	• Indirect emissions from purchased energy: • Electricity, heat, steam, and cooling purchased for own use (home energy use for work): 0.5 tonnes CO₂e
Scope 3 (Included Sources)	We report the following categories: 1. Upstream transportation and distribution: 0.3 tonnes CO₂e (minimal supply chain involvement) 2. Waste generated in operations: 0.15 tonnes CO₂e (general office waste disposal) 3. Business travel: 0.08 tonnes CO₂e (occasional public transport) 4. Employee commuting: 0 tonnes CO₂e (remote working setup) 5. Downstream transportation and distribution: 0 tonnes CO₂e (no physical products delivered)

Total Emissions	Our total emissions measure as 1.03 tonnes CO₂e .
------------------------	---

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- 100% of our energy consumption is monitored and managed
- We have switched to a renewable energy supplier
- At least 50% of our suppliers are local suppliers to reduce delivery distances
- We have run at least 2 workshops educating employees on sustainability initiatives
- We have put literature up to encourage eco-friendly behaviours in the workplace
- We have installed smart electronics devices to ensure all electronics turn off when not in use

We project that carbon emissions will decrease over the next five years to **0 tCO₂e** by **2035**. This is a reduction of **tbd%** from the baseline. Progress will be reviewed annually.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been implemented thus far. The carbon emission reduction achieved by these schemes will be measured against the baseline once established.

- We aim to products made from recycled materials
- We have implemented a "print-less" policy
- We always try to turn off electronics when not in use
- We reduce packaging waste by choosing minimal packaging options
- We reuse materials where possible

In the future we hope to implement further measures such as:

- Monitoring and managing energy consumption
- Installing solar panels on-site to generate electricity
- Switching to a renewable energy supplier
- Choosing local suppliers to reduce delivery distances
- Encouraging carpooling and public transportation use
- Implementing robust recycling programs

- Educating employees on sustainability initiatives
- Encouraging eco-friendly behaviours in the workplace
- Offering incentives for sustainable commuting options

Declaration & Sign-off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by:

Aashish Bhoja

Director, ABConsultancy Services Ltd

Date: 14 September 2026
